## Objective

Driven MCA candidate graduating in 2026 with a consistent 60%+ academic record and technical expertise in Python, Java, and Machine Learning. Seeking to leverage analytical problem-solving skills and a collaborative mindset to deliver innovative client solutions at Deloitte through the NLA 2026 program.

## Skills

**Programming languages:** Python, Java

**Databases:** MySQL

**Web Technologies:** Flask, Html, Streamlit

**Core Concepts:** OOPs, SDLC, Data Structures and Algorithms,

**AI/ML:** ML Algorithms, DL core Concepts

**Soft Skills:** Team collaboration, good communication skill

## Educational Qualifications

|                                                      |        |
|------------------------------------------------------|--------|
| Master of Computer Applications (Graduating in 2026) | 61.09% |
| Bachelor of Computer Applications                    | 67.07% |
| Diploma in Computer Science & Engineering            | 72.54% |
| XII standard                                         | 71.60% |

## Projects

### **Portfolio web application**

- Engineered a responsive personal portfolio using Flask for backend logic and Bootstrap for the UI.
- Deployed and maintained the live application on Render to showcase professional work.
- Click on this link to visit: <https://my-portfolio-5lx5.onrender.com/>

### **Image Captioning Using Deep Learning**

- Developed an end-to-end image captioning web application using TensorFlow and Python.
- Optimized model performance for real-time inference and deployed it via Streamlit Cloud.
- Click on this link to visit: [Streamlit](#)
